

# Snap-on®

presents

## Heritage Chrome

First there was the Orange County Chopper purpose-built motorcycle, now, for our second project we wanted to do something really special... So to celebrate the 50th anniversary of the 1957 Chevrolet Nomad we commissioned Dr Neon to build a replica of this classic car, and in just six months Dr Neon and his crew created this truly spectacular '2007 Glomad'.

**XOM605**

STANDARD LENGTH,  
METRIC, 60° DEEP OFFSET,  
12-POINT BOX WRENCH

(5 piece set, 10-19mm)

10 degree offset means closer fit in narrow, confined areas. Flank Drive® for 15 - 20% more turning power

List Price £116.05

Now only £79.95

**XSM608A**

SHORT LENGTH, METRIC,  
10° OFFSET, 12-POINT  
BOX WRENCH

(8 piece set, 6-7mm to 18-20mm)

Short handle allows access in tight, restricted areas. Flank Drive® for 15 - 20% more turning power

List Price £135.95

Special price £69.95

**XBM605A**

STANDARD LENGTH,  
METRIC, 10° OFFSET,  
12-POINT BOX WRENCH

(5 piece set, 10-19mm)

10 degree offset means closer fit in narrow, confined areas. Flank Drive® for 15 - 20% more turning power

List Price £108.30

Special price £64.95

**XLE605**

STANDARD LENGTH, TORX,  
10° OFFSET BOX WRENCH

(5 piece set, from E5-E20)

10 degree offset allows a close fit in narrow, confined areas. Extra reach is beneficial for the removal of timing belt cover bolts on Vauxhalls. Ideal for BMW bell housing and starter motors. Flank Drive® for 15 - 20% more turning power

List Price £117.75

Great value at £74.95

Choosing a Snap-on Wrench means you're making an investment in quality tools, designed for a lifetime of performance...

Comfortable handles and the ideal lengths mean the optimum leverage is delivered at all times, enabling you to apply high torques safely.

With over 90 specialist wrenches in our range we've put together a selection of just a few that offer some of our unique features and benefits.

We are so proud of our tools that we give them a 100% visual inspection that assures each one passes Snap-on's high standards of quality control. You can be certain that every Snap-on wrench you select will deliver a lifetime of performance – so much that we guarantee it!

**SBXM605**

**S-SHAPED, METRIC,  
0° OFFSET, 12-POINT  
BOX WRENCH**

(5 piece set, 10-19mm)

Suited to undercar/suspension use. Good for removing and fitting ancillary components such as fuel pumps, starters, alternators and compressors. Flank Drive® for 15 - 20% more turning power

**List Price £143.85**

**Now only £115.00\***

**XSO605**

**SHORT LENGTH,  
FRACTIONAL,  
60° DEEP OFFSET,  
12 POINT BOX WRENCH**

(5 piece set, from 1/4" - 13/16")

Deeply offset at 60 degrees to the handle so recessed fasteners can be easily reached. Increased knuckle clearance. Flank Drive® for 15 - 20% more turning power

**List Price £116.00**

**Unrepeatable price £89.95\***

**VSM807B**

**SHORT LENGTH, METRIC,  
10° OFFSET, 4-WAY ANGLE  
HEAD, OPEN END WRENCH**

(7 piece set, from 10-15mm)

Gain additional turning angles - offset at 30 and 60 degrees ensures both ends are the same size, permitting four different positions for one wrench. Excellent on Fuel and hydraulic lines

**List Price £140.45**

**Unbelievable value at £95.00\***

**\*FREE Watch  
worth £79.95  
with ANY of these 3 sets!**

**CMCWATCH08**

**FOSSIL/SNAP-ON  
CO-BRANDED CHROME-PLATED  
STEEL WATCH**

### Flank Drive®

Conventional 12-point wrenches make contact on the corner of the nut or bolt, so they can round off under high loads causing the wrench to slip and cause you injury! With Snap-on's Flank Drive®, contact is moved away from the corner with a radius and provides flat-to-flat contact for up to 20% more turning power.

### Mirror-Like Finish

Remember, Snap-on's tough, durable, nickel chrome plating doesn't just protect your tools against corrosion and make cleaning easier, they keep their finish longer too.

### Stronger Wrench

Snap-on's unique alloy steel mix and differential heat treatment means that our wrenches are stronger and more durable; with repeated heavy use some competitors' wrenches spread, causing them to slip. Snap-on wrenches hold their shape longer, maintaining that tight fit.

### High Performance Wrenches (XLE605)

These wrenches feature extra length and feature the smallest profile available; their thin long handles get them into areas you can't reach any other way – without sacrificing strength.

### 4-Way Angle Wrenches (VSM807B)

Unlike some competitors' wrenches that only give you at 15° and 60°, Snap-on's heads are set at 30° and 60° to the handle. This configuration enables you to flip this wrench four times to keep getting a new bite in tough situations. Continuous turning means faster work.

More than 350 special wrenches were supplied by Snap-on to construct some of the trim; opened 2-inch wrenches were used to fabricate the suspension arms to the grille, which was constructed from 'moon wrenches', while curved box-end wrenches were cut and fabricated to replicate the Nomad grille. Just look at the detail on the Glomad, it is astounding.
